Worksheet A4: Part IV Forecast Tracker

Companion to Super Intelligence Will Make You Obsolete, *Part IV Forecast Atlas*

Name: Date:

How to use: Each row is one chapter's most likely forecast (Tier 1) from the Part IV Forecast Atlas. Once a quarter, note the signpost you are watching and mark the status: *on track*, *early*, *late* or *wrong*. Being wrong is information, not failure.

Ch.	Most likely (Tier 1)	Signpost I am watching	Status and date
13	Discovery reorganizes around problem selection and pipeline direction as the scarce human contributions.		
14	Materials, fusion-relevant engineering, and biotechnology advance at visibly compressed timescales, with progress rates set less by insight than by fabrication, testing, and regulatory clocks.		
15	Human-inventor and human-author doctrines hold formally while boundary litigation over "enough" human contribution defines the decade.		
16	Verification, not generation, becomes the rate limit on usable discovery.		

What changed my mind this quarter:
