Worksheet A11: Part XI Forecast Tracker

Companion to Super Intelligence Will Make You Obsolete, *Part XI Forecast Atlas*

Name: Date:

How to use: Each row is one chapter's most likely forecast (Tier 1) from the Part XI Forecast Atlas. Once a quarter, note the signpost you are watching and mark the status: *on track*, *early*, *late* or *wrong*. Being wrong is information, not failure.

Ch.	Most likely (Tier 1)	Signpost I am watching	Status and date
41	Domestic and eldercare platforms normalize within a single product generation wherever they demonstrably reduce caregiver burden.		
42	The densest early embodied deployments remain inside fabs, energy facilities, ports, and defense perimeters, where containment geometry, insurance, and labor economics all favor concentration.		
43	The first serious embodied-SI incident will be a specification failure with zero component malfunction, and its primary damages will be institutional rather than physical.		
44	Safety governance consolidates at the design layer as real-time human supervision of SI-class systems is formally recognized as unworkable.		

What changed my mind this quarter:
